PART TWO

Marketing Plan

Partnership funds it · online ignites it · offline closes it — all building toward the Big Event.

HERITAGE CAN'T BE COPIED

40 years is a moat no competitor can cross.

A rival can match a spec sheet by Friday. Undercut a price overnight. Clone a campaign in a week. What they can never do — is manufacture **40 years of trust**.

2026 is the only year GIGABYTE turns 40. This anniversary is **non-renewable** — a once-in-a-generation license to tell our story at full volume. And the Big Event is where that story becomes something people can **touch, feel, and believe**.

Heritage on a screen is information. Heritage in a room is conviction.

If we don't claim this moment in 2026 — then when?

01

UGC · NOSTALGIA

"What parts were in your very first PC?"

GIGABYTE mainboard has been in Vietnam since the early 2000s — every first-gen builder has a story. **Closes naturally on the GIGABYTE 2026 lineup** — heritage leading to today's products, never a pitch.

02

CHALLENGE · VIRAL

"Build a Powered by GIGABYTE Infinity rig under X mil"

Vietnam's builder community runs on budget-optimization challenges. Hoàng Luân builds first → community follows → best build featured at the Big Event. **Components surface naturally as builders pick them** — no spec-dumping.

BRAND STORY · HUMAN

"GIGABYTE people, real stories" — confessional

04

AI · PRODUCT POWER

AI in Action — "Run AI right on your GIGABYTE machine"

Show GIGABYTE hardware running real AI: local LLMs, Stable Diffusion, AI-accelerated rendering, in-game AI upscaling. **The AI PC positioning made tangible** — ties directly to the university AI workshops and the creator/dev audience.

05

REACTION · AUTHENTIC PROOF

"First-timers try AORUS for the very first time"

Cast non-enthusiasts — students, casual gamers — for genuine first reactions. **The product speaks through the real experience**; unscripted surprise converts better than any review.
